

## **VATC Wins SOFPREP Work under CACI –**

January 17, 2012

Tampa, Florida – Visual Awareness Technologies and Consulting, Inc. (VATC) was recently awarded a \$1.0 million per year subcontract under CACI for the Special Operations Forces Planning, Rehearsal, and Execution Preparation (SOFPREP) Program. CACI competed for, and won, the task order under the Global Battlestaff and Global Support (GBPS) contract with U.S. Special Operations Command (USSOCOM).

VATC was a key member of CACI's proposal team thanks to various current employees with prior experience on the legacy SOFPREP Program, and thus, the win allows VATC to get back to the company's roots. VATC was able to add nine new employees to the workforce, which equals an approximate nine percent increase in direct contract personnel. The new task order runs through December 2016.

"We at VATC are very excited about continuing our support to USSOCOM through this important contract," says Sara Moola, President and Co-Founder of VATC. "SOFPREP was identified as a must-win contract as it returns VATC to our roots in the Program. Many current employees worked on SOFPREP at one point in their careers, and VATC hopes to remain part of the program for many years to come."

The GBPS contract is the contract vehicle of choice for USSOCOM's contractor support services, and CACI is one of four prime contractors (including SRA, Booz Allen Hamilton, and Jacobs Engineering) qualified to provide support to USSOCOM. CACI's decision to award this subcontract to VATC as a small, woman-owned business emphasizes their focus on implementing cost-effective solutions to better support the SOF Warriors.

Visual Awareness Technologies and Consulting, Inc. (VATC) is a leading provider of management services, joint training solutions, information technology, and engineering to Department of Defense, Federal agencies, and coalition partners in support of U.S. National Strategic objectives. VATC has 25 locations worldwide that provide daily interface on technical, programmatic and operations issues. Our foundation of experience is grounded in over 1,500 years of combined military, government and commercial operations, specifically in joint operational environments, and complex information technology infrastructure implementation and management.
