

## **VATC Wins \$6.7 Million Prime Contract Award on SeaPort-e –**

November 2, 2011

Tampa, Florida – Visual Awareness Technologies and Consulting, Inc. (VATC) was recently awarded a \$6.7 million prime contract under their U.S. Navy SeaPort-e contract for continued support to Special Operations Forces (SOF). This marks the first major prime contract award for VATC since the company began nearly nine years ago. Until now, the company had been operating as a subcontractor to numerous large businesses.

“Congratulations to the entire team for winning our company’s first prime contract award since our initial contract in 2003,” says Bryan LeBlanc, Director of Business Development for VATC. “Our hard-working proposal team got started early on the competition and VATC is now able to continue our outstanding support to the U.S. Special Operations Command (SOCOM) Training Transformation (T2) Program while offering a considerable cost savings to the government.”

With VATC as a subcontractor, USSOCOM had to pay a pass-through cost to work with the company, which has now disappeared by using the Seaport-e prime contract that VATC won in July 2010. The new task order runs through July 2014.

SeaPort Enhanced (SeaPort-e) is the contract vehicle of choice for future Engineering, Financial, and Program Management contractor support services. This decision to award a prime contract to VATC as a small, woman-owned business emphasizes the Navy's and USSOCOM's focus on implementing cost-effective solutions to better support our Warfighters.

“We at VATC are very excited about continuing our support to USSOCOM on this important contract,” says Sara Moola, President and Co-Founder of VATC. “We are focused on the success of our customers, and working to obtain this contract proves our dedication to providing rapid, affordable solutions now and in the future.”

Visual Awareness Technologies and Consulting, Inc. (VATC) is a leading provider of management services, joint training solutions, information technology, and engineering to Department of Defense, Federal agencies, and coalition partners in support of U.S. National Strategic objectives. VATC has 25 locations worldwide that provide daily interface on technical, programmatic and operations issues. Our foundation of experience is grounded in over 1,500 years of combined military, government and commercial operations, specifically in joint operational environments, and complex information technology infrastructure implementation and management.
